***Response to Arguments***

Applicant's arguments with respect to claims 1, 3-6, 9-12, 14-19 and 21-26 have been considered but are moot in view of the new ground(s) of rejection

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 3-6, 9-12, 14-19, drawn to determining the cost for blocking rates as associated with minimum power requirement and maximum transmission rate, classified in class 370, subclass 237, 252, 338, 395, 477.
  - II. Claims 21-26, drawn to a communication system wherein radio resource management includes borrowing power in an emergency burst transmission situation, classified in class 455, subclass 404, 414, 452.
2. The inventions are distinct, each from the other because of the following reasons:  
Group I claims calculating network blocking rates with respect to associated characteristics, whereas Group II claims borrowing power in an emergency transmission situation.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
